### Nearly 50 exhibitors at **ROTOR** live 2011

On 12 and 13 March 2011 the specialist model helicopter fair **ROTOR** live opens its gates for the second time to visitors from all over the world. A total of 48 exhibitors from every corner of Europe have already registered - an increase of more than 40 percent compared with the initial event. This shows once more that the concept of a specialised fair for model helicopter pilots is exactly right. Last year we had more than 7.000 visitors, and bearing in mind the appalling road conditions we can confidently expect a considerable rise in 2011. If you are one of them you will be able to see all the products of interest to you »live«, ask the firms' experts and pilots to explain their products, and in most cases watch them in the air. This time the list of exhibitors will once again include companies from all areas of model helicopter flying - scale, 3D, F3C, electronics and even turbine power units.
